WCF XUnit

Solution Architect / Lead .NET Developer

Museumkaart 2015 – 2017

Customer portal and webshop for the Museumkaart. Customers can purchase a Museumkaart online and pay with **iDeal**, register a Museumkaart that they have bought in a museum, create a **Museumkaart account** or use their **Facebook login** to manage multiple Museumkaarten, view a history of their museum visits, manage their personal data, manage their bank details and view their invoices.

I was responsible for the architecture of the application, I helped implement personal data management. I implemented the facial recognition service for the profile photo check and was responsible for the daily support of the development team.

- 🏗 create, communicate & maintain architecture
- 🔍 conduct code & design reviews
- {} write and maintain code
- 🛡 write and maintain unit tests & UI tests
- 👤 Lead development team
- 📦 setup and maintain CI/CD pipeline
- 📋 support backlog management
- 🕒 monitor application behaviour

Visual Studio 2017 .NET 4.7 SQL Server 2016 ASP.NET MVC Web API Entity Framework OAuth iDeal

Azure Key Vault Azure Cognitive Services Selenium Coded UI Tests Unit Tests

Senior .NET Developer

NHG 2017

Corporate portal of the NHG.

I was responsible for the development and maintenance of the application.

- 🔍 conduct code & design reviews
- {} write and maintain code
- 👤 Lead development team
- 📦 setup and maintain CI/CD pipeline
- 📋 support backlog management

Visual Studio .NET 4.7 Sql Server 2016 ASP.NET MVC DNN

Solution Architect / Lead .NET Developer

Bronnenbank 2015 – 2016

Asset browser in which students and teachers can browse through teaching materials. These teaching materials consists of audio and video clips and documents from different source systems and are shown to the users in an aggregated overview.

I was responsible for the architecture of the application and configuring the **SSO**. I was also co-responsible for the development and maintenance of the application and responsible for the daily support of the development team.

- 🏗 create, communicate & maintain architecture
- 🔍 conduct code & design reviews
- {} write and maintain code
- 🛡 write and maintain unit tests & UI tests
- 👤 Lead development team
- 📦 setup and maintain CI/CD pipeline
- 📋 support backlog management
- 🕒 monitor application behaviour
